**Back-End:** Node.js, Express.js | RESTful APIs | Authentication (JWT, Sessions)

**Databases:** MongoDB | MySQL

**Tools & Others:** Git & GitHub | VS Code | Postman | API Integration | Debugging & Testing

---

### PROJECTS

**Grilli Restaurant - Online Reservation & Ordering Platform** **HTML | CSS | JavaScript:** [Grilli.com](#)

- Built a clean and responsive restaurant website where users can order food online and book tables easily.
- Designed the pages with modern HTML & CSS, making the website mobile-friendly and visually appealing.
- Used JavaScript to add interactive features like menu filtering, pop-ups, and a working booking form.
- Improved user experience with simple animations, smooth navigation, & organized page layout.
- Showcased my frontend skills by turning a restaurant idea into a working web project .

**Groco - E-commerce Shopping Website** **HTML | CSS | JavaScript:** [Groco.com](#)

- Created an easy to use online shopping website where users can browse items and add products to their cart .
- Designed responsive and modern pages using HTML and CSS to improve user experience on mobile and desktop.
- Used JavaScript to build interactive features like product listing, cart updated, and smooth navigation.
- Organized the website layout clearly so users can shop quickly and easily.
- Showcased my frontend skills by building a functional and user friendly e-commerce interface.

**Car Rental Platform - Full Stack Project React | Express | MongoDB | PostgreSQL | JWT | Stripe | PayPal: [Car Rental.com](#)**

- Built a full-stack car rental platform where users can browse, book, and manage rentals.
- Developed a RESTful API for cars bookings, payment, and user profiles.
- Implemented JWT authentication with role base access (Admin & Customer).
- Integrated Stripe and Paypal for secure online payments.
- Used MongoDB/PostgreSQL for efficient data storage and real time updated with WebSockets.
